

## MENS SHIRT SIZE GUIDE

### MENS SHIRTS

Size		36	38	40	42	44	46
BODY Chest Measurement	in	35 - 37	37 - 39	39 - 41	41 - 43	43 - 45	45 - 47
	cm	89 - 94	94 - 99	99 - 104	104 - 109	109 - 114.5	114.5 - 119.5

\*\* Please note that the measurements above reflect the true measurement of the chest and not the measurement for the shirt

### HOW TO MEASURE

1. Measure ALL around the chest as outlined in the diagram, under the arm and around the widest part of the chest.
2. Take the chest measurement and see where the value lies within the BODY Chest Measurement chart above
3. Note the corresponding size above the measurement for placing your order online
4. If your chest measurement lies between sizes, then we suggest to order one size up for added room, or one size down for a more fitted look.

PLEASE NOTE: The length and sleeve measurements are only for reference to the corresponding size. The size of the shirt should only be determined by the chest measurement.

5. The length of the shirt sleeve is determined by measuring from the point where the neck meets the shoulder, over the head of the shoulder/arm, down to the point where the cuff finishes.
